Signature

Important Information: *Initial after each clause or indicate N/A if not applicable*

1. The City of Weyburn requires **48 hours notice** prior to construction to schedule a trench inspection. Call Public Works at 306-848-3290 for scheduling the trench inspection.

2. Your application must be accompanied with:
 - a. Traffic Plan/Detour Details
 - b. Contractor Name, qualifications and contact information
 - c. Detailed Design Plan

3. Not more than 30 days following construction an As-Built shall be provided to the City. _____
4. Water line renewals may be carried out with non-conductive plastic materials. If you carry out a water line renewal and your existing electrical system is grounded to your water supply line you may require an alternative grounding method after renewal. Proper grounding is the homeowners responsibility. Consult your electrician to ensure adequate grounding protection.

5. The City of Weyburn requires **48 hours notice** prior to backfill for an infrastructure inspection to be completed and approved. Contractors may be required to uncover any work installed and covered without approval.

6. As per the **City of Weyburn Service Connection Repair Fund**, your responsibility as the owner is to re-seed and re-landscape after backfilling and initial leveling has been carried out by the City of Weyburn; complete any corrective action required because of settlement on the owner's property; and provide for any replacement required to the service connection when water or sewer are upgraded to a larger size or as a result of property re-development or any new service connection. <https://weyburn.ca/water-sewer-service-connection-fund/>

7. No Furnco fittings to be used on new builds. _____

8. For new/replacement installed service lines from PL to building can be Type K copper or HDPE CSA certified with a minimum rating of 160psi for potable water and CTS (copper tube size). (City of Regina specifications: <https://www.regina.ca/export/sites/Regina.ca/business-development/land-property-development/.galleries/pdfs/Construction-Specifications/Water-and-Sewer-Service-Connection.pdf>)

9. A tracer wire must be ran with the water line from the curb box to the meter. _____

10. In every case where services are installed upon the request of the owner between the 15th day of November and the 1st day of May in the following year, the owner shall be responsible for the loss or damage to the said service by frost and shall pay the difference in cost arising from the increased cost of installation during the said period.

11. All costs associated with repairs and restoration to City infrastructure or public property that has been damaged as a result of the construction are at the cost of the Applicant.

FOR OFFICE USE ONLY:

- 1) Pavement Cut: _____
- 2) Sidewalk Cut: _____
- 3) Curb Cut: _____
- 4) Push or Tunnel: _____

COMMENTS: _____
